

WHAT IS CLAIMED IS:

1. A cleaning brush, comprising
a handle; and
5 a head part secured to one end of the handle; the head part having
a plurality of bristles fitted thereon; the head part including a plurality of
elastic sections so as to be capable of being bent and angularly displaced.
2. The cleaning brush as claimed in claim 1, wherein the bristles
include long bristles, and short ones.
- 10 3. The cleaning brush as claimed in claim 1, wherein each of the
elastic sections of the head part has a short side, and a long side while
the bristles include long bristles, and short ones; the short side facing a
same direction of the long bristles; the long side facing a same direction
of the short bristles.
- 15 4. The cleaning brush as claimed in claim 1, wherein the elastic
sections are made of soft materials.
5. The cleaning brush as claimed in claim 1, wherein the elastic
sections are made of resilient materials.
